ADAMU HALADU HALADU

FULL-STACK WEB DEVELOPER | AI + Web Apps

Middlesbrough, UK | +44 7774 746075 | hello@haladuadamu.com
Portfolio: haladuadamu.com | GitHub: github.com/neoscar10

PROFESSIONAL PROFILE

Full-stack web developer and current MSc Artificial Intelligence with Data Analytics student at Teesside University. Experience delivering responsive web applications, learner-facing technology, REST APIs and data-driven platforms using Laravel, React/Livewire, JavaScript, Tailwind CSS and SQL. Comfortable taking features from requirements through implementation and deployment, and communicating technical ideas to both developers and learners.

TECHNICAL SKILLS

Front end: HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap, Alpine.js, Livewire; React (working knowledge); responsive design

Back end & data: PHP, Laravel, REST API development/integration, authentication and role-based access, MySQL, PostgreSQL, SQL, Payment Gateways, Third party integrations, Webhooks, Websockets.

Development tools: Git, GitHub, Vite, deployment workflows, technical documentation, debugging and collaborating on web projects

PROFESSIONAL EXPERIENCE

Full-time Full-Stack Web Developer | Remote | Storesite, India — Nov 2020

- Designed and implementation of web apps and APIs for mobile apps
- Collaboration, automated testing, continues integration and deployment CICD
- Integrated REST APIs, user authentication and online payment functionality; used Git/GitHub to manage code and deployment changes.

Full-Stack Web Developer & 3MTT Instructor | Rhino Innovation Lab, Nigeria — Jan 2023 – Sept 2026

- Developed and delivered web applications across front-end interfaces, server-side functionality and database integration, working through the full development lifecycle.
- Mentored software engineering learners through Nigeria's 3 Million Technical Talent (3MTT) programme, explaining technical concepts and supporting practical projects.

Python Programming Instructor (Volunteer) | AI Bauchi Student Club, Nigeria — Jan 2023 – Jan 2024

- Delivered beginner-friendly Python sessions and supported the club website and digital communications, developing an understanding of learners' needs.

Freelance Full-Stack Web Developer | Remote / client projects — Nov 2020

- Designed and maintained client web applications using Laravel, Livewire, JavaScript, Tailwind CSS, Bootstrap and Alpine.js.
- Developed a data management system for the Yobe State Universal Basic Education Board, including structured educational records and database-driven workflows.
- Integrated REST APIs, user authentication and online payment functionality; used Git/GitHub to manage code and deployment changes.

IoT Developer Intern | nHub Nigeria, Jos — Mar 2023 – Sep 2023

- Contributed to dashboards, backend services and REST APIs for connected-device projects, including attendance and monitoring systems.

SELECTED TECHNICAL PROJECTS

Educational Data Management System • Laravel, SQL, REST APIs

Built a database-driven system for managing educational records for Yobe State SUBEB, with emphasis on clear workflows and maintainable application functionality.

Executive club cricket Laravel, SQL, REST APIs

Built a fully stack system for Cricket items memorabilia purchase, auction system, full e-commerce for sporting items and a secure user asset vault for high value items purchased on the platform.

Automated assistant for Indian Chattered accountants Laravel, React, Tailwind CSS, MySQL

Developed a full stack software supporting chattered accountants sending document request reminders to their clients through WhatsApp, using LLM (open AI) to analyze document to accept or request resubmission.

EDUCATION

MSc Artificial Intelligence with Data Analytics (with Advanced Practice) — Sep 2026 – Present

Teesside University, Middlesbrough, UK

B.Eng Computer & Communication Engineering — Graduated Oct 2024

Abubakar Tafawa Balewa University (ATBU), Bauchi, Nigeria | Second Class Upper
